
MIND
language
WORLD
what the words leave out
the channel is lossy in both directions — measured in RepQA
So: build the path that does not route through language
PART 1 The Foundation
Models for Brain Signals
PART 2 The Bridge
From Signals to Representations
PART 3 The Embodiment
From Representations to Interactions
HyBRiD
Neuro-attn
FA-EEG
ML → prior
prior → ML
neural priors — how the brain is organised
the prior travels back out
SWA
signals → semantics
PRISM — I
Brain Instruction Tuning
which space?
obj dog attr fluffy rel on grass
PRISM — II
D-Edit
semantics → action
Mind World Model
step-by-step actions
a goal, not a trajectory
DySta
VLA control the fast loop
PHIL
a path to the goal the slow loop
the direct path: brain signals → semantics → action, never through language
