Low-Readability Patient Education Agent

Why is sleep apnea dangerous?

Obstructive sleep apnea (OSA) leads to intermittent hypoxia during sleep due to upper airway obstruction, increasing cardiovascular risk.

Sorry. I still don't understand. ☹

High-Readability Patient Education Agent

Why is sleep apnea dangerous?

Sleep apnea is dangerous because your breathing stops during sleep, which can harm your heart and make you very tired during the day.

That sounds bad. I will ask my doctor.
